Professional Summary

Full-Stack Developer with 3+ years of experience building scalable web applications with React.js, Next.js, Node.js, Express.js, and MongoDB, plus e-commerce delivery on WordPress and Shopify and hands-on UI/UX design in Figma. Led a team handling product listing, graphics, website security, and SEO for a healthcare e-commerce platform. Strong in data structures and algorithms; uses AI-assisted tools (Cursor, GitHub Copilot, OpenAI, Claude) to ship faster without compromising code quality.

Technical Skills

Languages: JavaScript (ES6+), Java, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, GSAP, Responsive Design

Backend & Databases: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io, MongoDB, Redis

AI Tools & Automation: OpenAI API, Claude, GitHub Copilot, Cursor, Codex, Antigravity, n8n, Make.com, Replit

CMS & Platforms: WordPress, Shopify, Wix, SEO, Website Security & Performance Monitoring

Tools & Deployment: Git, GitHub, Vercel, Hostinger, Docker

Computer Science: Data Structures and Algorithms

Professional Experience

Lead Web Developer (Full Stack)

Savshka Digital Media Pvt Ltd

Dec 2024 – March 2026

Noida, Uttar Pradesh, India

- Design, develop, and maintain responsive web applications using Next.js, MongoDB, Tailwind CSS, JavaScript, and REST APIs.
- Build custom websites and customize CMS platforms (WordPress, Shopify) for e-commerce, portfolio, and business clients; handle monitoring, performance optimization, and maintenance.
- Develop SEO-friendly, responsive interfaces following UI/UX best practices.
- Adopted Cursor, GitHub Copilot, and Antigravity for AI-assisted development, improving sprint velocity by 35% while maintaining production-grade code quality.

Head of Digital Platform

Mediseller

Mar 2024 – Nov 2024

Delhi, India

- Built and managed WordPress e-commerce websites and conversion-focused landing pages using custom code for a healthcare e-commerce business.
- Led and guided a team across product listing, graphic design, website security, and SEO, setting priorities and ensuring efficient project delivery.
- Implemented on-page SEO and website security practices to improve search visibility and protect the platform.
- Managed product listings, ensuring accurate, consistent, and SEO-friendly information.
- Monitored overall website performance (speed, uptime, and user experience) and resolved issues proactively.

Web Developer

Savshka Digital Media Pvt Ltd

Nov 2023 – Feb 2024

Noida, Uttar Pradesh, India

- Built responsive, accessible interfaces with HTML5, CSS3, JavaScript, and React.js, meeting WCAG 2.1 standards.
- Partnered with designers and product managers to turn wireframes into performant UI components, reducing design-to-code turnaround by 25%.

Web Design Intern

Villam

Aug 2022 – Jun 2023

New Delhi, India

- Built responsive landing pages for an e-commerce project using HTML and CSS.
- Designed UI/UX for an e-commerce mobile app in Figma and Adobe XD, creating screens, layouts, and user flows.
- Created graphics and visual assets for the e-commerce brand and marketing needs.

Education

University of Delhi, Shyam Lal College

Delhi, India

Bachelor's Degree

Lal Bahadur Shastri Institute

Delhi, India

Diploma in Computer Application

Coding Blocks

Delhi, India

Java and Data Structures & Algorithms (in progress)

Projects

Real-Time Chat Application | *React.js, Node.js, Express.js, MongoDB, Socket.io, JWT – milan-chatapp.onrender.com*

- Built a full-stack chat platform where users can register, log in securely with JWT-based authentication or Google login, and manage sessions with protected API routes.
- Implemented a friend system with friend requests, accept/decline flow, and a friends list, so users can chat only with approved connections.
- Developed real-time one-to-one messaging with Socket.io, including instant message delivery, online/offline presence status, and live typing indicators.
- Added message editing and deletion, plus real-time notifications for new messages and friend requests.
- Integrated AI-powered chat so users can get smart responses inside the app.
- Designed a responsive interface on a scalable REST API architecture with MongoDB for persistent chat history and user data.

Blog Management Platform | *Next.js, Node.js, MongoDB, Tailwind CSS*

- Developed a full-stack blog platform with an admin CMS to create, edit, and delete posts, dynamic Next.js post pages, and category-based browsing.
- Built Node.js and MongoDB APIs for posts, categories, and metadata, and reusable Tailwind components for a consistent, responsive UI.

E-Commerce CMS Platform (UI/UX Design) | *React.js, Tailwind CSS, Responsive Design*

- Designed the end-to-end UI/UX for an e-commerce storefront and custom CMS admin panel, enabling non-technical admins to manage products, categories, and content without developer help.
- Built a reusable design system (components, typography, spacing, colors) and a fully responsive experience across mobile, tablet, and desktop.

Digital Marketing Website | *HTML5, CSS3, JavaScript, PHP – digital.adcliq360.com*

- Built a sleek, responsive digital marketing website optimized for speed and SEO. Crushed layout issues across devices with media queries, and leveled up performance by minifying CSS/JS and compressing assets. The site loads fast and ranks well—exactly what you want.

Service-Based Business Website | *WordPress, Elementor, WooCommerce, Yoast SEO*

- Created a polished WordPress site using Elementor for design and integrated essential plugins like Contact Form 7, WooCommerce, and Yoast SEO. Fixed plugin conflicts with custom CSS, optimized for search engines, and made sure everything works flawlessly on mobile.
